PHYSICAL MEDICINE AND REHABILITATION AND ELECTRODIAGNOSTICS

August 13, 2004

Re: Bill Batkin

To Whom It May Concern:

Mr. Bill Batkin has been performing a procedure called Acuscope and Myopulse electrical stimulation on some of my patients for pain management. It has been very effective for musculoskeletal and myofascial pain. The majority of my patients who have used this procedure have had significant reduction in their pain, if not resolution of their pain. I recommend considering Acuscope and Myopulse as an adjunct for pain management.

Sincerely,

ANN T. VASILE, M.D.
