ARTHROSCOPIC RECONSTRUCTIVE AND JOINT REPLACEMENT SURGERY

August 13, 2004

Re: Bill Batkin

To Whom It May Concern:

I am a board certified physical medicine and rehabilitation physician in Long Beach, California and specialize in sports medicine and the nonsurgical treatment of acute and chronic musculoskeletal injuries.

I have been referring patients to Bill Batkin for electrical stimulation treatment with the Acuscope and Myopulse machines for approximately two years now. I am very impressed with his expertise and the results I have seen in my patients. I have sent numerous patients for treatment who have had a variety of musculoskeletal injuries, many of whom have had very significant improvement. A number of these patients have previously had traditional treatment including physical therapy, but with no or only minimal improvement. Many of these patients subsequently had significant improvement with the treatment performed by Bill. I feel he offers a unique and beneficial treatment program that can be helpful to many patients who have pain from musculoskeletal injuries.

If you have any questions, please feel free to contact me.

Sincerely,

ERIC D. FELDMAN, M.D.
