

FERNANDEZ CHIROPRACTIC OFFICES

Palo Alto, CA.

February 16, 1986

Dear Colleague:

I wanted to let you know how the Electro-Acuscope 80 is working for me. I have been using the Acuscope since March, 1979 when it was first introduced at Los Angeles College of Chiropractic. I feel that I can say, without reservation, that this instrument has been the most valuable adjunct I have incorporated into my practice.

The Acuscope has provided remarkable pain control and healing in such conditions as whiplash injuries, torticollis, brachial plexus neuropathies, trapezius spasms, carpal tunnel syndrome, tennis elbow, low back sprains, spondylolesthesis, disc derangements, piriformis syndromes, sprained knees and ankles, plantar fasciitis and tarsal tunnel syndrome. I use the Electro-Acuscope on all of my patients (except the pregnant women) prior to performing my adjustment. I also use the Acuscope during the acute phase of an injury, even if an osseous adjustment of a deep heat modality is contra-indicated.

The Electro-Acuscope 80 serves another very important function in my practice. I have developed a number of techniques for treating functional endocrine disturbances with the Acuscope. Functional cases of dysmenorrhea, amenorrhea, anovulation, and hot flashes have been successfully treated with this remarkable instrument. If you or anyone else would like more information on my use of the Electro-Acuscope 80 please feel free to contact me.

Sincerely,
Marcy Radler, D.C.
