To Whom it May Concern,

The physical therapists have used the Electro-Acuscope for the last two and one half years and we have been more than satisfied with it's effect on both acute and chronic pain cases.

Our patient load has doubled in the last few years and physicians have consistently supported the use of Electro-Acuscope in the treatment plan. We have purchased three Acuscope machines and feel it has been a worthwhile investment.

The Electro-Acuscope has been called "the magic box" by a few of our medical people and patients.

In all, I feel that the Electro-Acuscope is truly a valuable modality in the treatment of acute and chronic pain.
